

WHITENOISE

Aerospace and Rocketry Student
Team from NTUA

ABOUT US

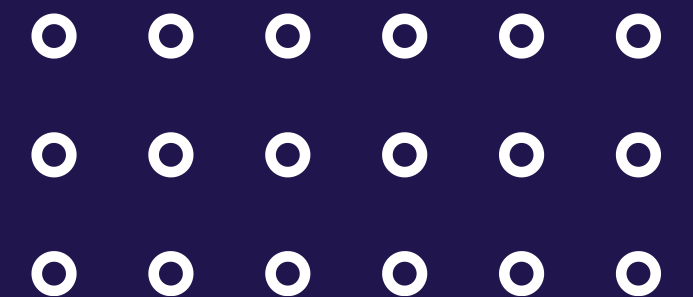

Our research is centered around aerospace engineering and rocketry.

We are part of the Machine Elements Laboratory within the Department of Mechanical Engineering at the National Technical University of Athens, Greece.

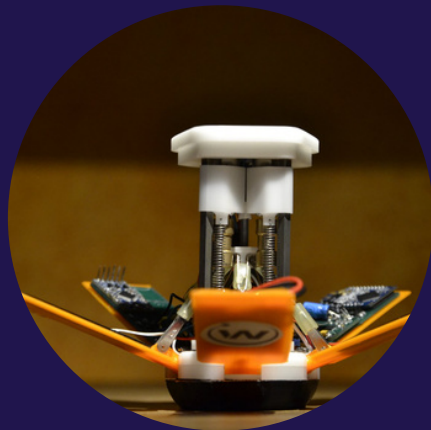

Our team consists of 15 undergraduate students. We are organized into departments based on the rocket's subsystems.

ABOUT US

DRILLSAT

1st place | CanSat
Competition in Greece
2017-2018

DAEDALUS

4th place | CanSat
World Finals
2019

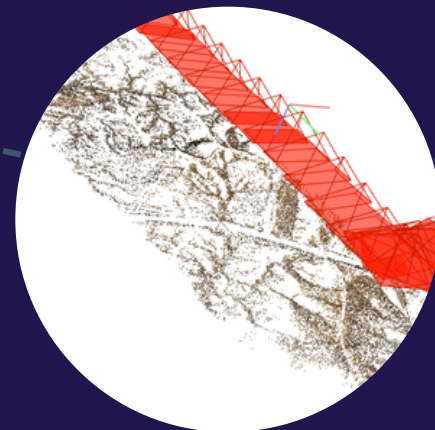

AURORA

first sounding rocket built
and designed in NTUA
2024

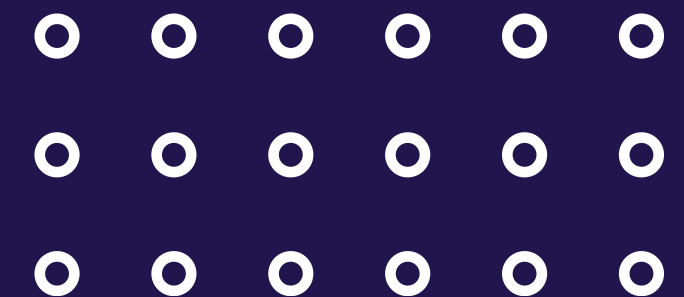

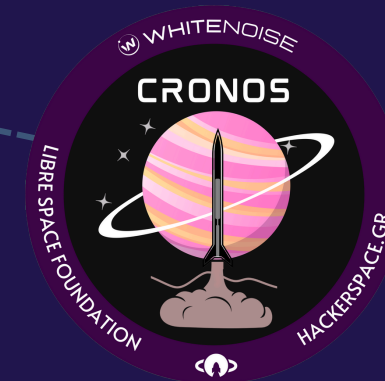

ICARUS

2nd place | CanSat
Competition in Greece
2019

CRONOS

first open-source hybrid-
fuel rocket motor
2019-2021

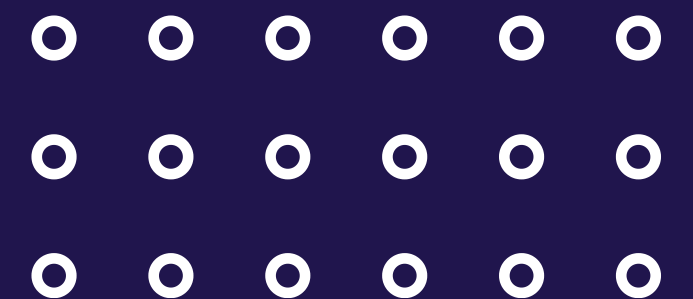

RECENT DISTINCTIONS

Secured 3rd place in the 4th Annual Ansys Competition, organized by SIMTEC presenting our **Project Aurora**

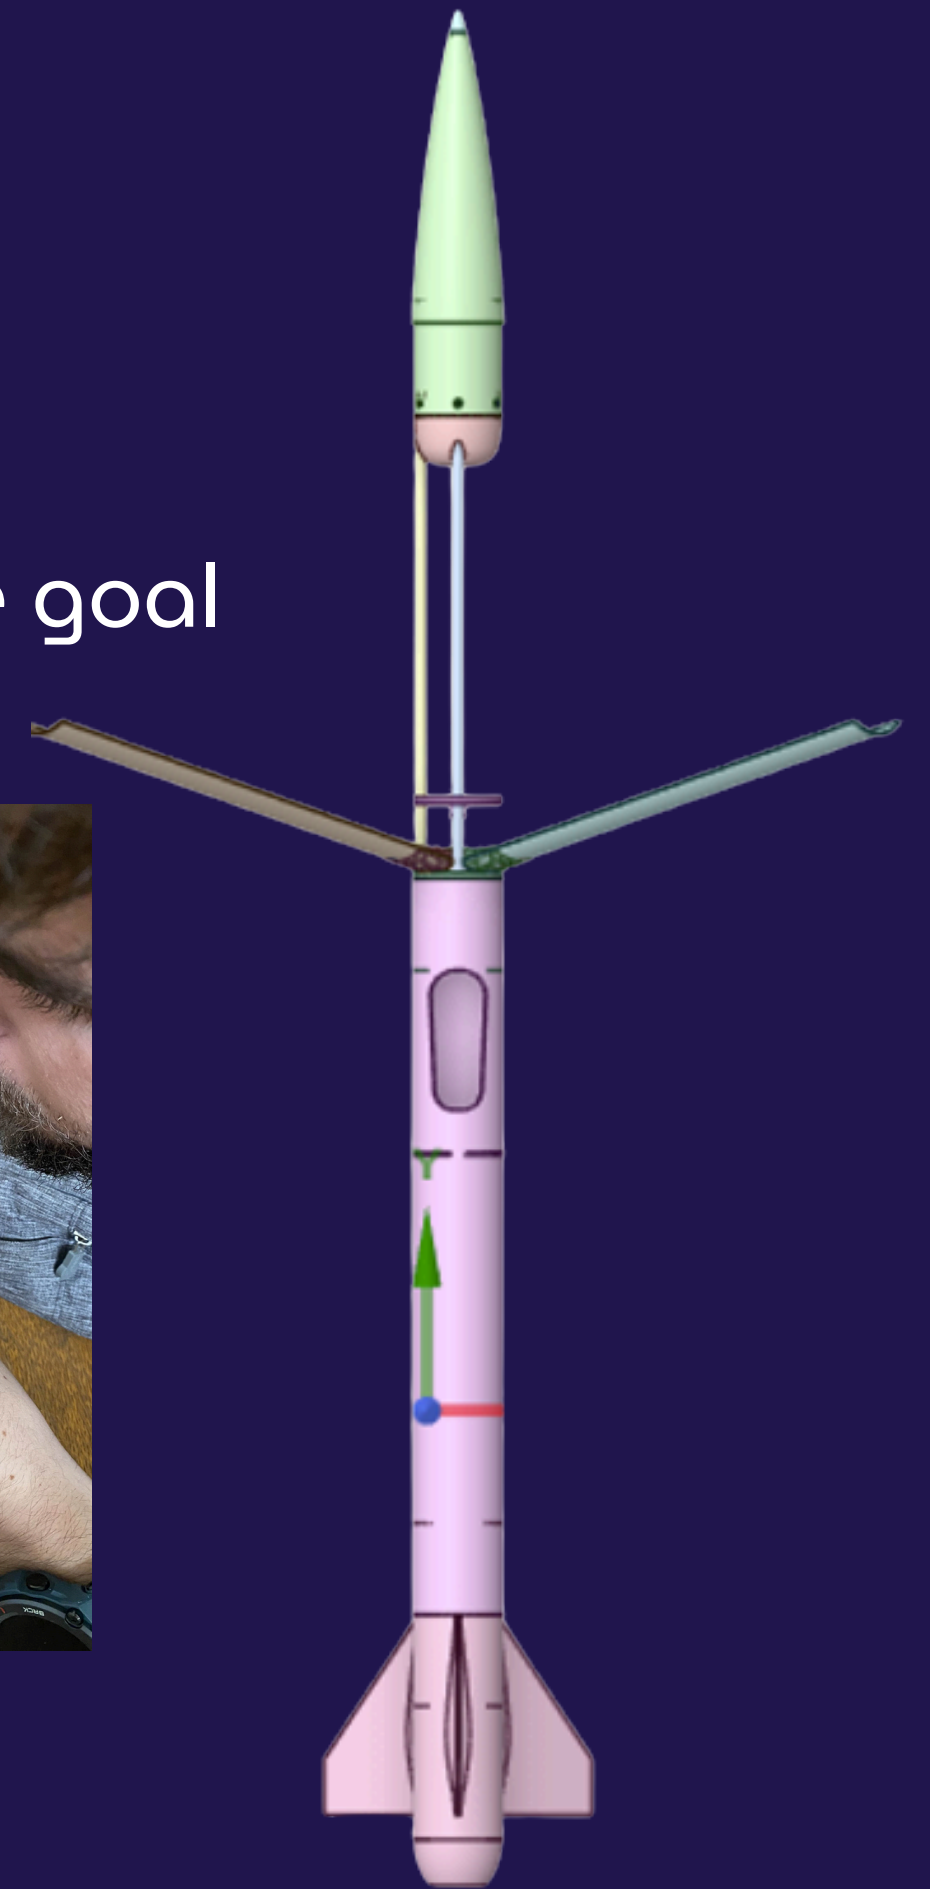

Leveraging Ansys for CFD and Structural Analysis in High-Power Rocketry

PROJECT AURORA

Project Aurora is dedicated to the design, development, and manufacturing of a solid propellant sounding rocket, with the goal of reaching an apogee of 3km.

PROJECT AURORA

- Design in 3D modeling software and familiarity with additive manufacturing
- Execution of strength (FEA) and flow (CFD) engineering simulations
- Machining of metallic and composite materials
- Optimization of the aerodynamic properties of the nose cone and fins
- Design of a dual-deployment recovery system with parachutes for safe landing

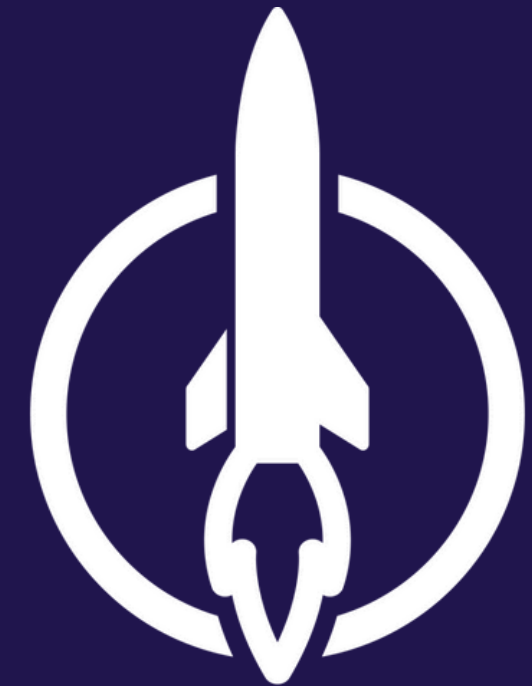

- Manufacturing PCBs and developing complex electronic circuits
- Developing a telemetry system for transmitting data to the ground station
- Developing an active automatic control system for the operation of the airbrakes
- Developing and conducting an innovative research experiment regarding the presence of microplastics in the atmosphere

OUR GOAL

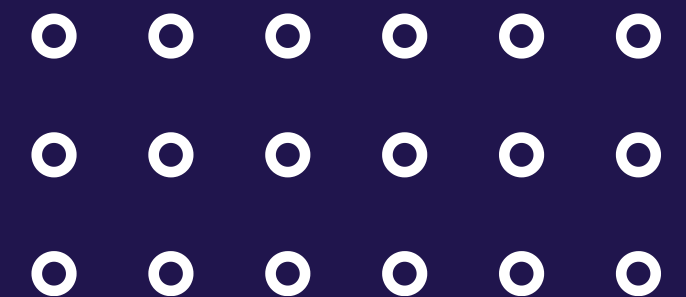

Our team plans to participate in the European Rocketry Challenge in October 2026 with Project Aurora.

- Organized in collaboration with the Portuguese Space Agency and the European Space Agency
- Participation of 30+ teams from top European universities

EUROC

EUROPEAN ROCKETRY CHALLENGE

OUR GOAL

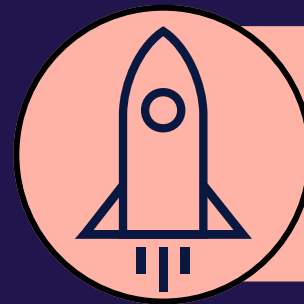

PARTICIPATION IN SBC CATEGORY
High-power rockets with solid propellant
and an apogee of 3 km.

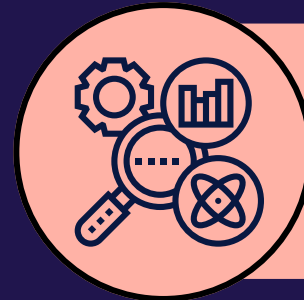

OUR VISION

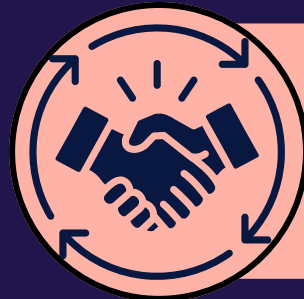

Beyond our participation in the European Rocketry Competition, we aspire to establish Greece as a center for aerospace research, strengthening the country's expertise and presence on the global aerospace map.

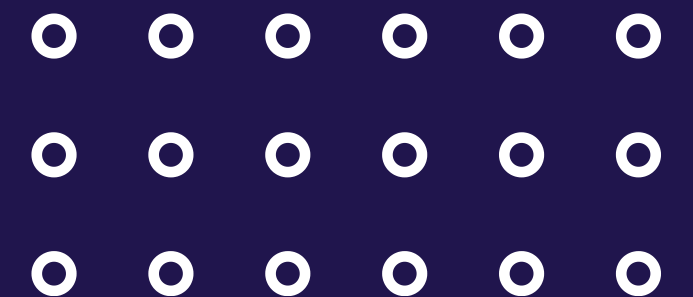

Advancing rocketry and aerospace technologies in Greece.

Implementation of research programs leveraging rocketry technology.

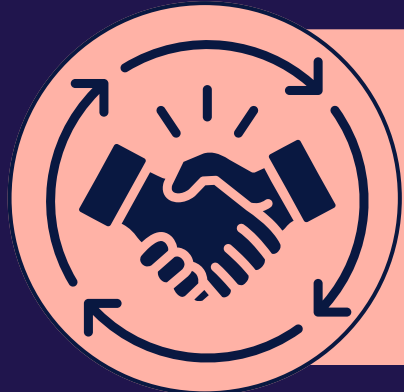

Fostering international partnerships between Greek student groups and universities abroad.

WHY SPONSOR US

BRAND VISIBILITY : Your logo and company name will be showcased on our rocket, team uniforms, events, and social media, reaching thousands of students, engineers, and industry professionals.

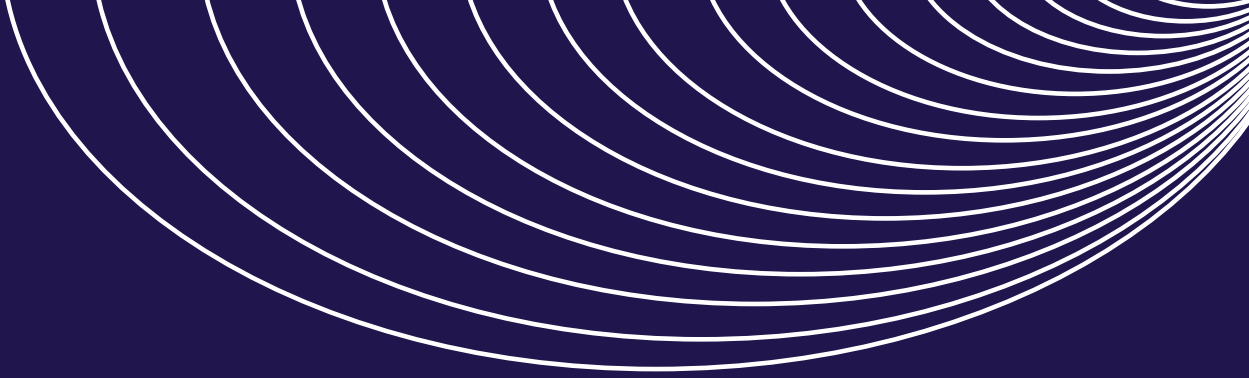

ACCESS TO A POOL OF NEW ENGINEERS : Collaborate with a passionate student team, consisting of future aerospace and technology professionals.

SUPPORT INNOVATION : Support the development of aerospace research and education in Greece, contributing to innovation, sustainability, and youth empowerment.

SPONSORSHIPS

Sponsorships in **PROJECT AURORA** is a one-time contribution and is valid for a lifetime. The corresponding tiers are included in the team's sponsorship package:

DIAMOND SPONSOR

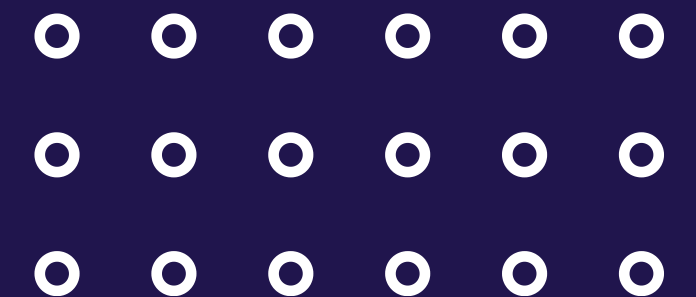

SILVER SPONSOR

PLATINUM SPONSOR

BRONZE SPONSOR

GOLD SPONSOR

SUPPORTER

SPONSORSHIP PACKAGES

TIERS	SUPPORTER	BRONZE	SILVER	GOLD	PLATINUM	DIAMOND
Highlighting our cooperation through Social Media	X	X	X	X	X	X
Logo placed on the team shirt, website, team and project banner	X	X	X	X	X	X
Logo placed on the rocket, scaled appropriately	X	X	X	X	X	X
Display and promotion of company-branded items at the rocket reveal event		X	X	X	X	X
Social Media Story (1 per month)			X	X	X	X
Option to host a branded stand at the rocket reveal event				X	X	X
Option to get team members' CV's for internship opportunities					X	X
Promotion of your involvement through interviews and press coverage						X
